CONFINED SPACE

WHAT IS CONFINED SPACE?

The words “confined space” sounds small, but they could be big. Examples include tanks, access shafts, utility vaults, sewers, pipes, and truck.

HAZARDS ASSOCIATED WITH CONFINED SPACES INCLUDE:

- Toxic Atmosphere. A toxic atmosphere may cause various acute effects, including impairment of judgement, unconsciousness and death.
- Oxygen Deficiency.
- Oxygen Enrichment.
- Flammable or Explosive Atmospheres.
- Flowing Liquid or Free Flowing Solids.
- Excessive Heat.

CONTROL MEASURES FOR CONFINED SPACES:

Placing a standby-person outside the confined space to communicate with the person undertaking the task, and initiate emergency procedures if required. Providing personal protective equipment (PPE) and other safety, rescue and first aid equipment.

CONFINED SPACE REQUIREMENTS:

- Competence, training, supervision and suitability.
- Permit-to-work procedure.
- Gas purging and ventilation.
- Dangerous residues.
- Testing and monitoring of the atmosphere.
- Mechanical, electrical and process isolation.
- Respiratory protective equipment.

“MANDATORY PPE IS REQUIRED WHEN ENTERING CONFINED SPACES”.
